Summary

I am a Wordpress Developer passionate about building high-quality software and exceptional user experience. With over 5 years of experience in developing web applications and web services combined with a B.S. in the field of Information and Computer Science, I strive to bring every new project to excellence.

I love what I do which is no wonder why I often use my free time developing my own products. It's a great journey to leveling up my skills and learning new things.

I love astronomy and cycling! Other hobbies, well... if you consider watching movies a hobby, then bear in mind that Sci-Fi is my thing.

That was me in 30 seconds If you want to get to know me better, let's grab a cup of coffee (or beer) and have a chat!

Experience

Codeable

Skopje

Cosmic Development

3 years 11 months

PHP/Wordpress Developer

September 2014 - April 2018 (3 years 8 months)

Skopje

Cosmic Development is an IT development company which provides a wide range of IT services. It was founded in 2011 and it has over 100 employees with offices in three countries (Macedonia, Canada and Serbia).

Working as web developer using the following technologies:

- PHP & MySql
- Wordpress themes & Plugins' development/modifications
- Laravel 5+ web applications development

Projects I worked on:

Laravel projects:

- Reporting platform

* Generates daily reports based on data gathered (automatically by api or manually by uploading .csv/.xlsx files) from multiple monetization platforms like revcontent,contentad,outbrain,taboola etc.

All data parsed in two final reports (daily and by campaign)

- Donation site with custom built recurring payments

Some of the Wordpress plugins I have created for clients are:

- Plugin for ads managing on the site
 - * Displaying ads on various locations using custom widget or injecting after paragraph/image/page
 - * Displaying ads based on different rules (combination of utm params and page number)

- Plugin for listing related posts
 - * Custom selection of posts
 - * External source posts
 - * Using in-stream api to include sponsored posts from various platforms like revcontent

- Plugin for post/page navigation
 - * Custom selection of next post per post or globally
 - * Multiple button design templates allowing multiple buttons to be created of same or different template with different color for each new button for split testing purposes

- Plugin for showing X numbers of slides on each page
 - * Additional implemented logic is showing X numbers of slides on 1st page, Y numbers of slides on 2nd page and Z numbers of slides on 3rd+ pages

- Plugin for optimizing galleries
 - * Rotates pages all pages in the post and re-orders them by CTR in descending order

Tools:

Tracking platforms: Jira, Asana, Trello

Communication: Slack, Skype, Hangouts

Version control: Git

Intern

June 2014 - August 2014 (3 months)

Skopje

As an intern my responsibilities were to:

- Get familiar with the company's workflow
- Help other developers with PHP & MySQL tasks
- Learn and upgrade my knowledge

Freelancer at Upwork

PHP Freelancer at Upwork

July 2016 - March 2017 (9 months)

As freelancer on Upwork I worked on different projects:

- Developing Wordpress plugin for injecting ads after paragraphs

- Creating Wordpress site with premium theme

- * Also included DNS updating and redirecting of two other domains to the primary one

- * Site url: <http://fortecover.com/>

- Wordpress custom RSS feed integration with Mailchimp

- Creating upload functionality for images using dropzone.js and Laravel 5+

- Creating two sites in Wordpress from scratch

- * PSD to Wordpress theme

- * Whole backend logic (PHP & MySQL)

- * Bootstrap

- * jQuery

- * HTML/CSS
